UNIVERSITY of WASHINGTON

Software Design for Data Science

Course updates

Melissa Winstanley
University of Washington
February 15, 2024

Hope you had a happy Python & bash Valentine's Day!

Standups!

Error on the website: Final Presentations

Final presentations will be Wednesday March 13, 5-8pm, as on the calendar.

NOT 6-8:30pm as on the syllabus - whoops!

Let me know if you have issues with the scheduling.

Guest lecture for final class (3/7)

- Data Scientist at Spotify
- Let us know what you're interested in hearing about!
  - Add your questions in the survey on the Syllabus

Due today: project software design exercise

- You've uploaded to GitHub, right?
- We'll take a look and give you a grade, as well as any notes on your proposed design.
- You may fix any issues for regrade during the final project evaluation

Next week: initial project demo

- Goal: show off what you've done so far
  - …you've done something so far, right?
  - It doesn't have to be anywhere near complete!
  - But it should do something
- How it will work
  - The TAs and I will walk around the room
  - You'll demonstrate your project to either a TA, or both a TA and me
  - Low stress!
- Grading: participation

Office hours: Melissa's updated hours

Monday evenings, 6-8pm on Zoom for next week

And of course always by appointment!

Mithali's office hours will be next Thursday 3:30-4:30pm for NEXT WEEK only - not Wednesday

Lastly…. This week!

Testing!

- Homework 4
- Testing expected for your project
